

Stealth Parking Post Randomly Keyed Galvanised, Galvanised & Colour or Stainless

The original hinged parking post; patented in 1959 is still the preferred choice for the protection of individual parking spaces throughout Britain, the Stealth Post has all the benefits of the original but with the further advantage of a fully flush to ground level socket. The extremely durable and reliable design of the parking post ensures your parking space will always be available. The reflective, high visibility band ensures your parking post will always be seen.

The AUTOPA Stealth Parking Post is unlocked by rotating the key (Supplied with 2 keys) and allowing the spring loaded lock barrel to move outwards. The post is then fully raised or lowered and relocked by pushing the lock barrel back in.

<u>Part Number</u>	<u>Description</u>	<u>Weightm (kg)</u>
138 300 401	Galvanised	21kg
138 300 404	Galvanised & Colour	21kg
